BACKGROUND

The Chamberlain Investment Company (CIC) is a planned spa resort which may include a restaurant and greenhouses as well as grottos and swimming pools. The State Engineer's office has issued a non-consumptive water right to CIC. This water right cannot exceed 1.00 cubic feet per second. There is one cold water well and two hot water wells that CIC will be able to obtain the mineral water from for the use of the spa. The flow from the grottos and swimming pools will enter a concrete serpentine manmade creek to decrease the chlorine and increase the dissolved oxygen before the discharge water enters Salt Creek.
